

# Clean & Green Rest Rooms

06 January 2023

[Blog » Waterless](#) | including Falcon Velocity™ Cartridges

## Colton Village Hall Goes Waterless

Colton Village Hall is a modern, recently refurbished facility just 2 miles north of Rugeley in mid Staffordshire. Available for weddings, meetings and other events it opened in 1991. The hall has undergone a major refurbishment and redevelopment in the last two years; Coltonians believe they have one of the best village halls in Staffordshire.

It was time to upgrade the Gents washroom after 30 years. Leaking urinal cisterns with faulty timers were removed and replaced with clean and green waterless urinals.

Trustee, Mr Richard Monbiot commented - 'As a Management Committee we wanted to reduce costs and our impact on the environment. Installing Waterless Urinals saves water and gives us immediate and significant cost savings; freeing funds to invest elsewhere. I found the Waterless Cartridges web site, called for advice and the rest is history!'

## Falcon Lava Waterless Urinals & Falcon Velocity™ Cartridges

The Falcon Lava Urinal features a patent-pending, splash-free design with contemporary styling and a mid-size wall footprint making it ideal for retrofits or new construction. The Lava includes a special area for messaging which can be used to promote water saving features and other environmental benefits. Alternatively, this space could be used as revenue generating advertising space.

Velocity™ Cartridges are easy to fit and are secured using the cartridge removal key provided (one per cartridge). Velocity™ Cartridges are installed in the housing at the base of the urinal which, in turn, is connected to the standard waste. When installed correctly the cartridge provides a perfect air-tight fit.

### Features and Benefits

- Improved hygiene and safety
- Waterfree
- Reduced water and sewer costs
- No moving parts
- No costly flush valve or sensor repairs
- Patented, sealed locking cartridge
- Odour-free
- Vandal resistant
- Maintenance-free cartridge
- Smooth, non-porous surfaces
- Minimal care and easy cleaning
- Vitreous china bowl
- Unsurpassed durability
