

Arched Head Door Control

Methodist Chapel, Malham, North Yorks

Dating from 1865, the Chapel was restored recently by builders Brewsters under the supervision of Overton Architects. Once work was completed volunteers were keen that unhindered access to the chapel should be available to the congregation and potential visitors between certain times on a daily basis. Out of hours security is paramount and achieving the right balance between the two objectives is where Relcross Door Controls were able to provide a solution backed by experience, expert guidance and proven products.

Wall Mounted Closers

LCN 4000T wall mounted door closers are the perfect 'pull side' solution at arched head doors requiring access control - moving the closer mechanism away from the door/frame and maintaining full hydraulic control over both opening and closing arcs.

Electro-Magnetic Locks

Securitron 32 series electro-magnetic locks provide a clean, switchable locking method with the flexibility to mount via Z brackets to the pull side face of arched doors/frames.

Specification Services

We are the UK's principle source for ANSI quality, CE certified door hardware. We offer a free technical specification and advisory service to assist you in the correct choice of equipment. We keep substantial stocks of most products. Our team of trained specifiers will discuss problems, offer guidance, make recommendations and, most importantly, help on site if difficulties should occur.

For further information about Relcross door controls and other door hardware visit www.relcross.co.uk, call Relcross on 01380 729600 or e: sales@relcross.co.uk
